WORK EXPERIENCE

Application Development - Professional I

Dec. 2025 – Present

Fiserv

Berkeley Heights, NJ

- Develop and enhance custom applications for the DNA core banking platform, working directly with financial institution clients to understand business requirements and deliver solutions.
- Develop and optimize SQR programs and SQL queries for custom applications, reporting, and data transformations.
- Troubleshoot client-reported application issues by reviewing code and analyzing system behavior to resolve bugs.
- Provide technical support for custom applications by answering client questions, investigating issues, and communicating solutions to ensure reliable application functionality.
- Create and maintain technical documentation for custom applications to provide clear technical guidance for both internal teams and clients.

Web Programming Course Assistant

Sept. 2024 – Dec. 2024

Stevens Institute of Technology

Hoboken, NJ

- Conducted weekly office hours, providing guidance to 30+ students on assignments and reinforcing course concepts.
- Tested and reviewed automated grading scripts to ensure consistent and error-free grading for lab assignments.
- Clarified complex course topics to improve student comprehension and problem-solving skills in web development.
- Evaluated and graded student assignments with detailed, constructive feedback, enhancing students coding skills.

Web Developer (Contract)

Sept. 2023

The Lawn Spa

Cliffwood, NJ

- Developed a fully responsive website for a landscaping company and deployed it on Vercel: [The Lawn Spa](#).
- Ensured seamless adaptability across devices with a mobile-friendly layout by using a responsive design.
- Implemented a contact form allowing direct client communication, using NodeMailer to handle email submissions.
- Monitored and resolved technical issues, implementing improvements enhancing website stability and functionality.

EDUCATION

Stevens Institute of Technology | Hoboken, NJ

Dec. 2024

Bachelor of Science in Computer Science

GPA: 3.75

PROJECTS

Audio Ave | *JavaScript, HTML, CSS, Handlebars, Node.js, Express.js, Git, Spotify API*

- Led a team of four developers to create a social media-style app for Spotify listeners, leveraging the Spotify API.
- Developed the user profile pages and the middleware to handle Spotify authentication and authorization.
- Contributed to AI-generated playlist functionality, Spotify stats tracking, and a social playlist-sharing feed.

BiomechVIS | *Python, Plotly, Dash, Bootstrap, CSS, Git*

- Collaborated in a team of five to develop a data visualization tool for the Biomedical Engineering Lab at Stevens.
- Implemented functionality to plot data from various `.mat` files onto interactive 2D and 3D graphs.
- Developed intuitive menus allowing users to create an unlimited number of 2D graphs with multiple data points.
